ABOUT THE BOOK :

This book is written for people who would love to learn the concert zither, but who don't speak German to use the existing Zither Tutors or live where there are no zither teachers.

There is of course no substitute for having a face to face lesson with a qualified zither teacher, but if that is not possible, this book might get you off to a good start today.

It features:

- Uncomplicated modern teaching methods
- Written in plain English language
- Clear notation and diagrams
- Many familiar fun tunes
- Chord charts for fretboard and open strings
- Studio quality CD recorded on zither with metronome
- Each of the 78 exercises on a separate track with a one bar count-in

-
'A short demonstration video introduces the book on Youtube (zithergirl) and two more videos show "how to tune the concert zither" and "how to replace a zither string".
